

Panel 2: Integrating Strategic Foresight Into Risk Management

Speaker: Alain Goudreau

Head, Risk Assessment and Capability Integration, Defence Research and Development Canada

Alain Goudreau is a Civil Engineer employed with the Defence R&D Canada (DRDC) – Centre for Security Science (CSS), located in Ottawa, Canada. Prior to joining DRDC in 2004, Mr. Goudreau served for 28 years as a Military Engineering Officer in the Canadian Forces, retiring at the rank of Lieutenant-Colonel. He is a graduate of the Royal Military College, Canadian Forces School of Military Engineering, Canadian Land Force Command and Staff College, and has a Masters of Science degree in Defence Technology from Cranfield University/Royal Military College of Science, United Kingdom. Mr. Goudreau has held various command and staff appointments, including Head of Military Engineering Equipment Requirements. He has also co-chaired the research program in Military Engineering and directed programs in Security Engineering and Enhanced Blast Protection. On joining DRDC, Mr. Goudreau was the main desk officer responsible for developing the Public Security Technical Program (PSTP) and managing the establishment of an Explosives Community of Practice and Project Portfolio. He currently heads a public safety and security Risk Assessment and Capability Integration Section and associated portfolio activities.
