

## Panel 4: Big Shifts and Discontinuities

### **Speaker: Steven Weber**

Professor of Political Science and the Information School, University of California, Berkeley

STEVEN WEBER, Professor of Political Science and the Information School at UC Berkeley, works at the intersection of technology markets, intellectual property regimes, and international politics. He focuses on the political economy of knowledge intensive industries, with special attention to health care, information technology, software, and global political economy issues relating to competitiveness. He is also a frequent contributor to scholarly and public debates on international relations and US foreign policy. Over the last 20 years Weber has advised multinational companies, government agencies, and non-profit organizations on risk analysis, strategy, and business forecasting in the areas of international political risk, technology, and global economic change, in part through Monitor Group in San Francisco and The Glover Park Group in Washington DC. His 2004 book, *The Success of Open Source*, is the leading study of the political economy of the open source software community. His recent books *The End of Arrogance* (2010) with co-author Bruce Jentleson sets terms of global leadership for an emerging era of ideological competition; and *Deviant Globalization* (2011) with Nils Gilman and Jesse Goldhammer analyzes moral arbitrage in the global black market economy.
