

SKAN TO TREND

OBJECTIVE

To identify emerging issues and trends by analyzing signals from a broad range of sources using themes & networks

1. Scope **RESEARCH AREA**
2. Identify **RELEVANT DOMAINS** from data
3. **PRIORITISE KEYWORDS** to filter unrelated data
4. Shortlist **RELEVANT REPORTS**
5. Identify **DRIVERS AND ACTORS** of interest
6. Generate **RELEVANT THEMES** for analysis
7. **INVESTIGATE THEMES** using additional research
8. Generate **INSIGHTS** from themes

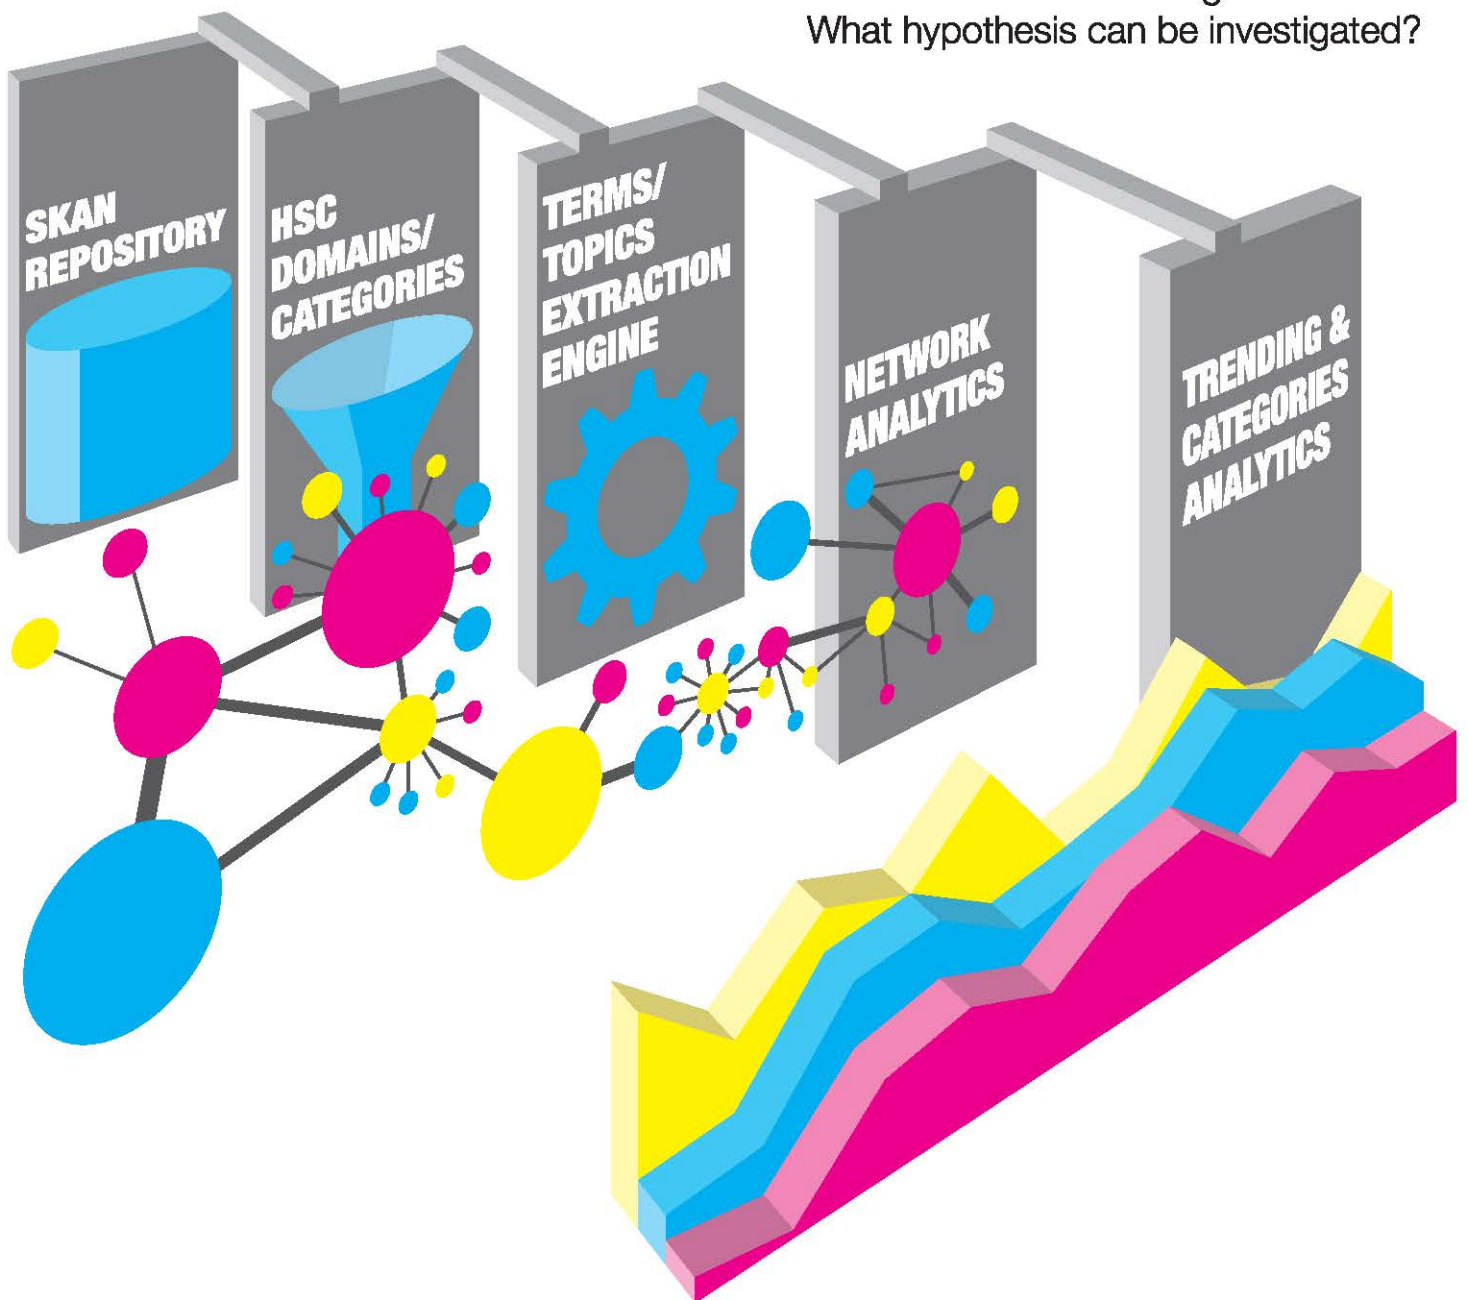

SKAN TO TREND

DISCOVERY OF CROSS-CUTTING THEMES AND INSIGHTS

OBJECTIVE

Using visual analytics to discover issues and trends from SKAN* publications.

- Which domain(s) are present?
- How are the domains interconnected?
- What themes surface from the chosen domains?
- How does the theme change over time?
- What hypothesis can be investigated?

* SKAN is an information service provided by the Horizon Scanning Centre at the National Security Coordination Secretariat. This bulletin highlights interesting issues from multiple domains of relevance to Singapore, based on regular scanning of diverse open-source information feeds.
